(Intermediate)	
Government Millat High School, LAHORE.	**2017-2019**
(Matric)	

Project:

Designed and developed a platform that allows users to explore recipes, check menu availability in hotels, and place orders for both vegetarian and non-vegetarian dishes.

Features:

- Users can create accounts, browse hotel menus, and view detailed recipes categorized by vegetarian or non-vegetarian options.
- Hotels can list available dishes with details like ingredients, preparation steps, and availability status.
- Customers can add dishes to a cart and place orders seamlessly.
- Admin functionality to manage users, hotel details, menu listings, and order processing.

Outcome: Successfully developed a responsive and user-friendly application prototype that streamlines recipe exploration and hotel menu ordering, enhancing the experience for both customers and hotel administrators.
